

## **The Environmental Song** **By Raymond Burke**

Last thing at night - switch off the telly  
Turn off the light - don't stuff your belly  
Don't fill the kettle the whole way up  
When you're only wanting a teeny weeny cup  
Walk to your school and be clever  
And the planet will last for ever

There's plenty of power out there  
All we really have to do is share  
We don't need fossil fuels  
If we follow all the golden rules

Last thing at night - switch off the telly  
Turn off the light - don't stuff your belly  
Don't fill the kettle the whole way up  
When you're only wanting a teeny weeny cup  
Walk to your school and be clever  
And the planet will last for ever

Windmills catching all the wind  
Always use recycling bins  
Wave power solar power too  
This is all you have to do

Last thing at night - switch off the telly  
Turn off the light - don't stuff your belly  
Don't fill the kettle the whole way up  
When you're only wanting a teeny weeny cup  
Walk to your school and be clever  
And the planet will last for ever  
Walk to your school and be clever  
And the planet will last for ever
